

SLTCGRIP Clips for Heater Cable on Asphalt Shingle Roofs

Pack of 25 Clips

Attach ice dam heater cable to your roof without using penetrating fasteners (nails, screws, etc.). Sometimes putting holes through your asphalt shingles will void your roofs warranty. These situations require a solution free of such penetrations to secure your ice dam heater cable, while keeping it securely attached to your roof. The SLTCGRIP clip is the answer.

- No Tools Required to Install
- Made of weather resistant high-quality aluminum
- .325" grip thickness fits 95% of all asphalt shingles sold in North America
